WATER TANK CONSTRUCTION CONTINIUES IN SPRING 2021

Construction of the new Hayden Lake Irrigation District water tank to provide essential water needs for the community.

A new two-million-gallon water tank for Hayden Lake Irrigation District (The District) is under construction at the corner of Lacey Avenue and Highway 95 in Hayden. The tank is critical for the existing system and will provide an updated and reliable water system for daily household activities and community fire protection, as well as water storage for emergency operations. This location was chosen out of many to provide the most reliable, economical and efficient siting for the water tank.

Construction started in September 2020 and will resume in late April after a winter break. April construction will begin with finishing the foundation and the new tank will begin to be visible. Construction is scheduled to be substantially complete by August 2022. The work is anticipated to cause minor impacts to the surrounding community. Impacts will include minor construction noise, dust and localized vibrations. Hours for construction will be between 7 a.m. and 7 p.m. and consistent with the City of Hayden's noise ordinance. Please like and follow the new Hayden Lake Irrigation District Facebook page for ongoing updates: @HaydenLakeIrrigationDistrict.

In this Spring of 2021, there will be localized traffic impacts on Lacey Avenue from Reed Road to Highway 95 due to water main and sewer main construction. Lacey Avenue will be open to local traffic, emergency vehicles, mail, and garbage, with detour routes for through traffic. Road closure will last for approximately 60 days and occur during construction hours.

Updated information regarding this project and other District activities are available on the website, (www.haydenirrigation.com), Facebook page or by contacting 208.772.2612 or District@haydenirrigation.com.
